NEPTUNE

NEPTUNE

A little piece of **hot tub heaven** for your own home or garden.

The Neptune range, our most popular models, can seat five to six people comfortably, offering enough space for all the family or a great place to relax with friends. With a craftsman-built cedarwood cabinet and fitted sculpted headrests on all models, the Neptune range provides the highest quality hot tub experience for a range of budgets.

The Saturn, with 16 hydromassage jets, runs on a standard 13-amp supply, and offers an opportunity to enjoy a six-seater tub for a price equivalent to that of a much smaller model.

Add an air blower and 14 bubble injectors to the Saturn, and the Fortuna offers you the benefits of dual hydro and air massage at an affordable price, still running on a standard 13-amp supply.

The top of the range Neptune has a total of 33 hydromassage jets, including two adjustable neck jets. The Neptune is equipped with two water pumps, an air blower and a deluxe control system, runs on a 20-amp supply and offers the ultimate hot tub bathing experience.

MANUFACTURED IN THE UK

Sold direct, cutting out the 'middle man' and saving money, without compromising quality or service.

We use the highest quality materials and the most advanced components available and adhere to strict quality controls. Our hot tubs are enclosed in craftsman-built cabinets of western red cedarwood, complete with a hard-wearing plastic base.

We are proud to be able to quote a standard delivery time of two weeks from receipt of order. A small refundable deposit will secure your order and reserve your delivery date. We accept both deposit and balance payments by credit or debit card.
